

EMVS is the **European Medicines Verification System**, guaranteeing compliance with European Directive 2011/62/EU.

1

Scans the unique identifier of the medication

3

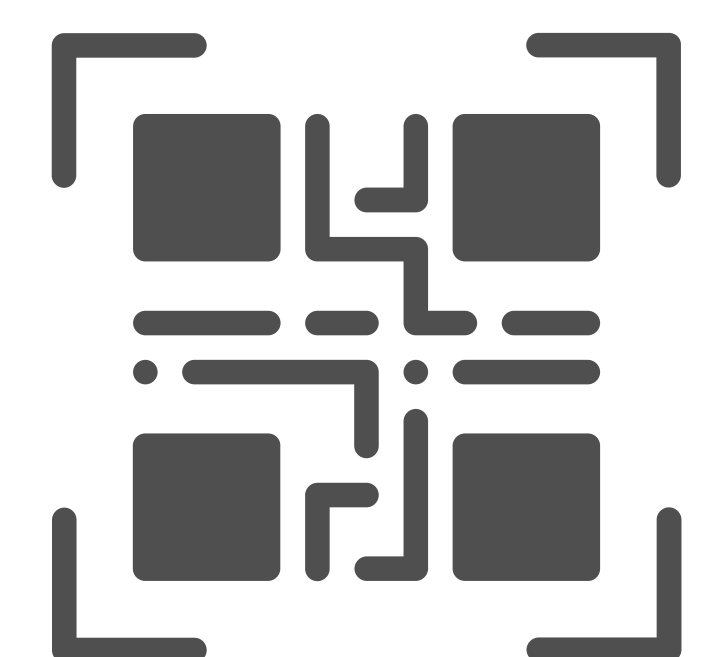

The EMVS response allows for the processing of the medication (dispensation agreement, quarantine, destruction, etc.).

4

The pharmacist manages their stock and dispenses medications

2

PharmaliZr connects to the European Verification System Database (EMVS).

High-density 2-dimensional barcode called «**Datamatrix**»
